

Anti Vibration Mount Rubber

As the professional manufacture, we would like to provide you Anti Vibration Mount Rubber Mounting Feet. And we will offer you the best after-sale service and timely delivery. Our Rubber Feet are manufactured using a high quality Commercial Rubber or Nitrile and are available in three main variants, these being Tapered, Straight and Octagonal sided bases. Fixed Adjustable Rubber Feet are a popular part for use with a range of applications, this includes as Furniture Feet, Refrigerator Feet where they can assist and add grip when used with hard surfaces (such as wood, tiles). These Threaded Rubber Feet are also widely used inside industrial settings where they provide an ideal level of shock absorbing and vibration dampening properties at a low cost when compared to other dampening solutions.

1. Product Introduction of the Anti Vibration Mount Rubber Mounting Feet

We have established a reputation for high-quality custom Anti Vibration Mount rubber mounting feet. We pay very attention to detail and committed excellence for every project, coupled with our experience and knowledge of the industries we serve, ensure that your Anti Vibration Mount rubber mounting feet will exceed your expectations.

Advantage of our Tire Repair Patch Mushroom:

Anti-vibration rubber mounts are critical components in a number of household appliances, heavy machinery and industrial equipment. These rubber dampening vibration mounts help dampen the high frequency noise levels and vibration while safeguarding fragile components from external vibrations.

2. Product Parameter (Specification)

Product Name:	Anti Vibration Mount Rubber Mounting Fee
Material:	NBR, HNBR, EPDM, SILICONE, VITON, FLS, FFPM, PTFE
Size:	Any size, Customized/standard and nonstandard
Color:	Black

Xiamen Liangju Rubber Technology Co., Ltd.

Tel: +86-592-7255151

E-mail: Dylan@tec-rubber.com

Packing:	plastic bag&carton box or according to your requirements
Sample time:	20-25days
Application:	Electrical
Warranty:	2years

3. our service.

1. Inquiry about our products can be replied within 12 hours.
2. Professional & experienced staff help you solve problems of silicone and rubber products.
3. Accept customized shape, material, hardness, temperature, size, color, logo and packing.
4. Mode of production: Compression or injection or extrusion.
5. We have a comprehensive range of in-house manufacturing facilities, allowing us to provide fast and effective manufacturing.

4. Quality Control and Certifications

We serve our customers with high quality Customized Shape Rubber Gaskets by strictly follow ISO 9001:2015 and IATF 16949.

5. Packing, Payment and Shipping

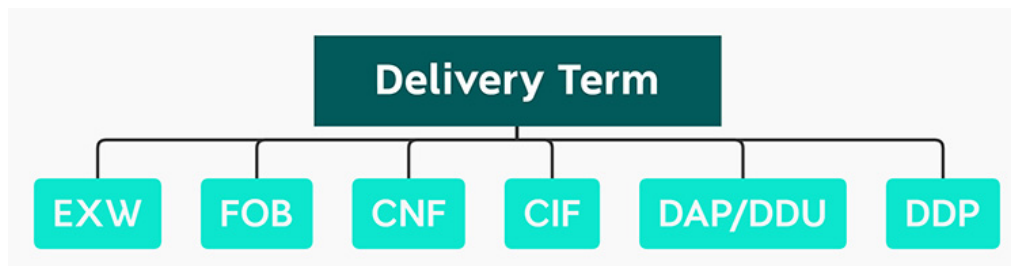

Our packing for all the Customized Shape Rubber Gaskets, strong enough to ensure its safety throughout the whole delivery no matter domestic or oversea shipping. Customized Packing/LOGO/Labeling are Available.

ISO 9001 : 2015

IATF 16949 : 2016

6. FAQ

1. Do you supply material?

Yes, we have our own mixing rubber factory and can supply you with Synthetic Rubbers to fit your applications.

Xiamen Liangju Rubber Technology Co., Ltd.

Tel: +86-592-7255151

E-mail: Dylan@tec-rubber.com

2. If OEM is acceptable?

Yes, Samples are Free of charge

3. What Is EPDM Rubber ?

EPDM is a synthetic rubber polymer and is made from ethylene and propylene monomers. This rubber was developed in the early 1960's and used to produce variety of products like radiator and steam hoses, freezer gaskets, tires, roofing membranes and aircraft seals to name only a few.

4. Why is rubber used to produce industrial products?

Rubber has certain unique properties which makes it suitable to produce rubber products which are widely used in various industrial applications. Rubber is water repellent. It is resistant to alkalies and weak acids. Rubber has elasticity, toughness, impermeability, adhesiveness, and electrical resistance. These properties make rubber useful as an adhesive, a coating composition, a fiber, a molding compound, as well as an electrical insulator.

5. Which type of rubber is best for my application?

There are a range of natural and synthetic rubbers with different properties, making some more suitable than others for particular applications—the key of course is choosing the most appropriate one! For specific requirements, please ask our rubber products specialists for guidance.
