

High Temperature Resistant Silicone Rubber Heater Hose

As an ISO and IATF certified manufacturer, we specialize in manufacturing of an extensive range of stabilizer rubber bushing, that are known for accurate dimension and high performance. These bushes are fabricated using finest quality raw material. Our range reduces the noise during operation and appreciated for wear & tear resistance, heat resistance and trouble free and noiseless operation. You can rest assured to buy customized High Temperature Resistant Silicone Rubber Heater Hose from us. We look forward to cooperating with you, if you want to know more, you can consult us now, we will reply to you in time!

1. Product Introduction of the High Temperature Resistant Silicone Rubber Heater Hose

The silicone rubber heater hoses are engineered with superior flexibility and durability, Standard & Premium heater hose are resistant to coolant additives, as well as hardening, cracking, cold leaks, and aging. Manufactured from a strong EPDM rubber, this hose provides great heat resistance which makes it suitable for many hot water applications such as in vehicle heating and cooling systems. Heater hoses are used to transfer the excess heat, in the form of engine coolant, from the engine into the heater core. Once the heated engine coolant reaches the heater core, it travels through small tubes inside the heater core.

2. Product Parameter (Specification)

Product Name:	High Temperature Resistant Silicone Rubber Heater Hose
Material:	EPDM
Size:	Any size, Customized/standard and nonstandard
Color:	Black
Packing:	plastic bag&carton box or according to your requirements
Sample time:	20-25days
Application:	Automotive

Warranty:	2years
-----------	--------

3. our service.

1. Inquiry about our products can be replied within 12 hours.
2. Professional & experienced staff help you solve problems of silicone and rubber products.
3. Accept customized shape, material, hardness, temperature, size, color, logo and packing.
4. Mode of production: Compression or injection or extrusion.
5. We have a comprehensive range of in-house manufacturing facilities, allowing us to provide fast and effective manufacturing.

4. Quality Control and Certifications

We serve our customers with high quality Customized Shape Rubber Gaskets by strictly follow ISO 9001:2015 and IATF 16949.

Dimensional Inspection

Incoming QC

In-process QC

6. FAQ

1. Do you supply material?

Yes, we have our own mixing rubber factory and can supply you with Synthetic Rubbers to fit your applications.

2. If OEM is acceptable?

Yes, Samples are Free of charge

3. What Is EPDM Rubber ?

Xiamen Liangju Rubber Technology Co., Ltd.

Tel: +86-592-7255151

E-mail: Dylan@tec-rubber.com

EPDM is a synthetic rubber polymer and is made from ethylene and propylene monomers. This rubber was developed in the early 1960's and used to produce variety of products like radiator and steam hoses, freezer gaskets, tires, roofing membranes and aircraft seals to name only a few.

4. Why is rubber used to produce industrial products?

Rubber has certain unique properties which makes it suitable to produce rubber products which are widely used in various industrial applications. Rubber is water repellent. It is resistant to alkalies and weak acids. Rubber has elasticity, toughness, impermeability, adhesiveness, and electrical resistance. These properties make rubber useful as an adhesive, a coating composition, a fiber, a molding compound, as well as an electrical insulator.

5. Which type of rubber is best for my application?

There are a range of natural and synthetic rubbers with different properties, making some more suitable than others for particular applications—the key of course is choosing the most appropriate one! For specific requirements, please ask our rubber products specialists for guidance.
